Preface vii

Introduction: Science and the Social 1

MARTIN CARRIER

Part I. The Play of Values within the Core Areas of Scientific Research

1. Must Evidence Underdetermine Theory? 17
JOHN D. NORTON
2. Values and Their Intersection:
Reduction as Methodology and Ideology 45
MARGARET MORRISON
3. Values, Heuristics, and the Politics of Knowledge 68
HELEN E. LONGINO
4. Replacing the Ideal of Value-Free Science 87
JANET A. KOURANY
5. Scientific Values and the Values of Science 112
JAY F. ROSENBERG

Part II. The Demands of Society on Science: Socially Robust Knowledge and Expertise

6. How Robust Is “Socially Robust Knowledge”? 131
PETER WEINGART
7. In Defense of Some Sweeping Claims about Socially
Robust Knowledge 146
ROGER STRAND
8. Third Wave Science Studies:
Toward a History and Philosophy of Expertise 160
CHRISTOPHER HAMLIN

**Part III. The Exigencies of Research Funding:
Epistemic Values and Economic Benefit**

9. The Community of Science® 189
JAMES ROBERT BROWN
10. Science in the Grip of the Economy:
On the Epistemic Impact of the Commercialization of Research 217
MARTIN CARRIER
11. Promoting Disinterestedness or Making Use of Bias?
Interests and Moral Obligation in Commercialized Research 235
MATTHIAS ADAM
- Index* 256
