Contents

Preface ix

History of Science

1 What's New in Kepler's New Astronomy? 3
   Bernard R. Goldstein

2 Experiment, Community, and the
   Constitution of Nature in the
   Seventeenth Century 24
   Daniel Garber

3 Isaac Newton on Empirical Success and
   Scientific Method 55
   William Harper

4 A Peek Behind the Veil of Maya: 87
   Einstein, Schopenhauer, and the Historical
   Background of the Conception of Space as a
   Ground for the Individuation of Physical
   Systems
   Don Howard

Foundations of Mathematics
   and Physics

5 From Constructive to Predictive
   Mathematics 153
   Geoffrey Hellman
6 Halfway Through the Woods: Contemporary Research on Space and Time
   Carlo Rovelli

7 What Superpositions Feel Like
   David Z Albert

8 The Preparation Problem in Quantum Mechanics
   Linda Wessels

9 Schrödinger’s Cat and Other Entanglements of Quantum Mechanics
   Jeffrey Bub

10 Deterministic Chaos and the Nature of Chance
    John A. Winnie

11 Models, the Brownian Motion, and the Disunities of Physics
    R. I. G. Hughes

Induction, Scientific Methodology, and the Philosophy of Science

12 The Continuum of Inductive Methods Revisited
    Sandy L. Zabell

13 Science Without Induction
    Frederick Suppe

14 That Just Don’t Sound Right: A Plea for Real Examples
    David L. Hull

15 A Logical Framework for the Notion of Natural Property
    J. Michael Dunn
