

# CONTENTS

Acknowledgments	<i>xv</i>
Introduction	3
1. The First Generation of Organicists	15
2. Needham's Revival of Mechanism	42
3. Socrates and the <i>Principia Biologæ</i>	56
4. The Tipping Point	81
5. Waddington and the Organizer	93
6. The Original Theoretical Biology Club	104
7. Large Plans versus the Ultimate Littleness of Things	117
8. As Many Opinions as There Are Men	127
9. "Off in all directions like an expanding universe"	141
10. Mechanism Reduced to Molecules	159
11. The Lysenko Morality Tale and the Epigenetic Landscape	172
12. Ernst Mayr, Neo-Darwinism, and Beanbag Genetics	189
13. History of Science Is Written by the Laureates	200
14. The 1960s Reincarnation of the Debate	211
15. The Conventional Wisdom of the Dominant Group, or COWDUNG	226
Conclusion: A Third Way after Waddington?	234
Epilogue: Is Modern Epigenetics Organic?	251
Notes	261
Bibliography	295
Index	321
